Group 11 – Midterm Presentation

Members:

Ishani Bhagunde, Oluwaseun Okuneye, Anirudh Yadav Boosa, Damian Mercado, Falis Gaal

PrepMate

This project is a web-based cooking management system designed to help users organize their recipes, plan weekly meals, and automatically generate grocery lists. Our goal is to streamline the cooking and meal-planning process by providing a simple, user-friendly interface that keeps everything in one place.

The app will support core features such as recipe storage, meal planning, and list generation, with a focus on accessibility, ease of use, and efficient workflow.

Origin + Problem

Origin:

- Wanted to simplify meal planning for busy students and families
- Many people keep recipes, grocery lists, and meal plans on separate apps
- We combined everything into one application

Problem:

- People waste time switching between recipe apps, notes, and grocery lists.
- Meal planning can be confusing and unorganized.
- Grocery shopping often leads to forgotten or duplicate items.

Scope & Requirements (SRS)

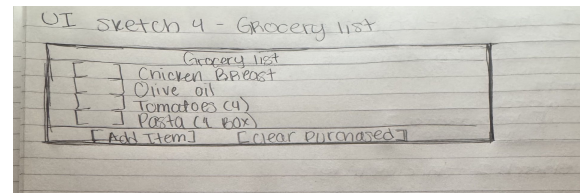

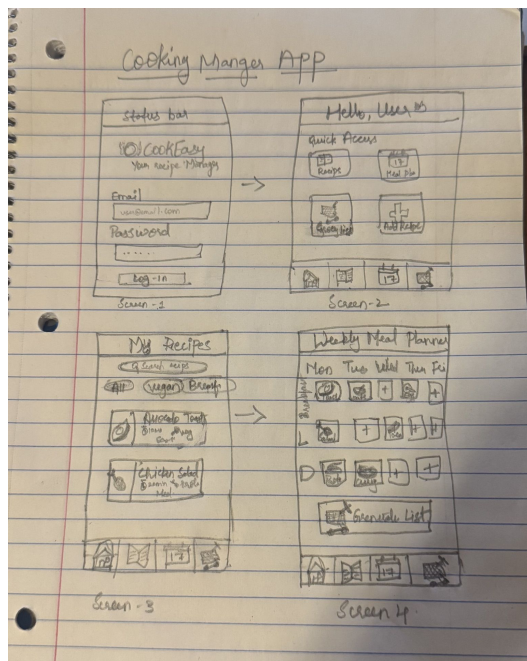

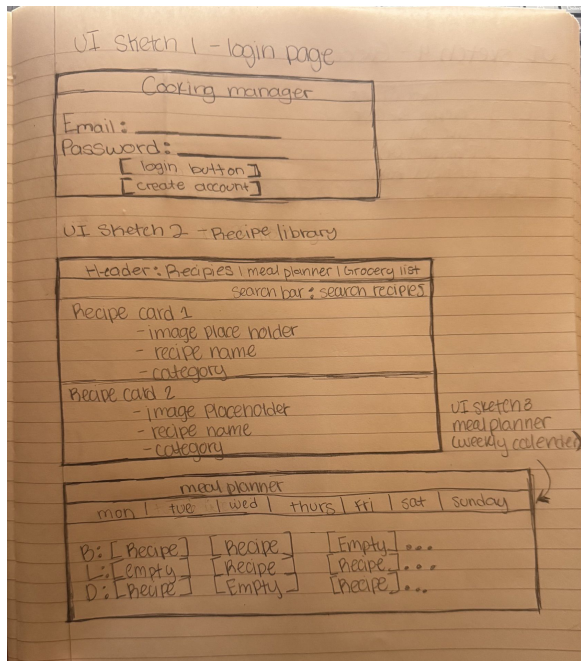

Project Scope

- Users can create an account.
- Save and organize recipes.
- Plan weekly meals.
- Generate grocery lists.
- Mark grocery items as purchased.

Requirements

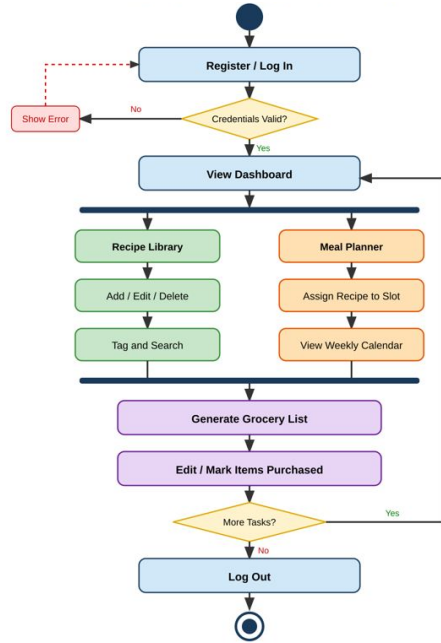

- User authentication
- Recipe database
- Meal planner
- Grocery list generator
- Responsive web interface

Early Concept Sketches

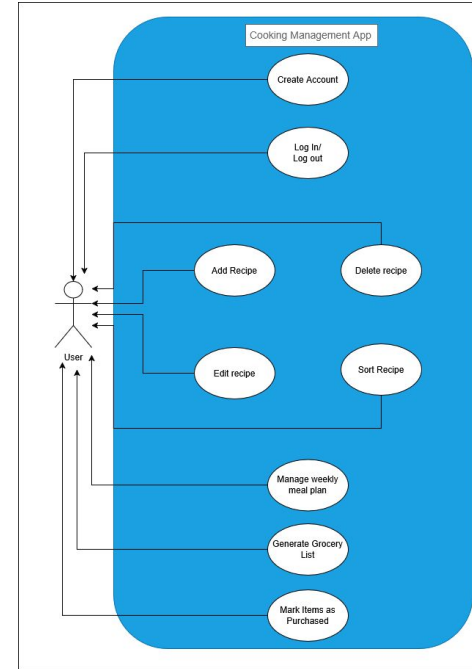

- Initial layout exploration for login, recipes, meal plan, grocery list
- Focused on simple navigation and clean structure
- Used sketches to guide early design decisions

UML Diagrams (I)

Weekly Meal Planner

Week of June 16 - June 22

Meal	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Breakfast	Toast	+ Add	Oats	+ Add	Eggs	Waffles	+ Add
Lunch	Salad	Wrap	+ Add	Soup	Bowl	+ Add	Pasta
Dinner	Fish	+ Add	Stir Fry	Steak	+ Add	Pizza	Curry

Generate Grocery List

Meal Plan Calendar

Grocery List

☒ Chicken-Breast2 lbs

☒ Olive-Oil1 bottle

☐ Tomatoes4

☐ Pasta1 box

☐ Avocado3

☐ Garlic1 bulb

+ Add Item

Clear Purchased

2 of 6 items purchased

Grocery List

Accessibility & Usability

Accessibility

- Designed to support screen readers, alt-text, and keyboard navigation
- High-contrast colors and readable fonts for users with visual impairments
- Clear labels and consistent layouts to reduce cognitive load
- Mobile-friendly so students can access features on any device

Usability

- Simple, clean interface with minimal steps per task
- Easy navigation between recipes, meal plans, and grocery lists
- Consistent button placement and predictable screen flow
- Quick-access features for common actions (add recipe, generate list, etc.)

Methodology: Agile

- Work completed in small, iterative steps
- Team reviews progress regularly and adjusts as needed
- Flexible planning so features can change based on feedback

Tools Used

- Trello for task tracking
- GitHub for version control and collaboration
- Visual Studio Code for backend development
- Postman, Express.js, and Node.js for API development

Project Management

Agile Approach

Team Workflow

- Tasks move through: To-Do → In Progress → Review → Done
- Each member takes ownership of specific tasks
- Weekly check-ins to stay aligned and update progress

Benefits of Agile for Our Project

- Easy to adapt as requirements change
- Faster delivery of small features
- Better collaboration and visibility for the whole team

Project Management - Agile Approach

Methodology: Agile

- Work completed in small, iterative steps
- Team reviews progress regularly and adjusts as needed
- Flexible planning so features can change based on feedback

Tools Used

- Trello for task tracking
- GitHub for version control and collaboration
- Group chat for quick communication

Team Workflow

- Tasks move through: **To-Do** → **In Progress** → **Review** → **Done**
- Each member takes ownership of specific tasks
- Weekly check-ins to stay aligned and update progress

Benefits of Agile for Our Project

- Easy to adapt as requirements change
- Faster delivery of small features
- Better collaboration and visibility for the whole team

Sprint Update

Completed:

- Core Recipe Management System
- Main UI screens
- Added grocery list functionality
- Finalized the UML diagrams
- Finalized the wireframes

Remaining Tasks:

- Authentication
- Recipe import
- Meal planner functionality

Hours Worked

Group 11	
Team Members	Hours
Ishani Bhagunde	12
Oluwaseun Okuneye	10
Falis Gaal	6
Anirudh Yadav Boosa	2
Damian Mercado	2

Initial Working Version Demo
